CHARACTERISTICS OF WORK

This position operates under the supervision of the Assistant Division Head. This position manages the network, security and telecommunications staff for day-to-day operations, including coaching and providing other performance feedback as appropriate. Additionally, this position will ensure network service level commitments are met or exceeded, driving consistent best practices and support procedures to ensure services are delivered efficiently, consistently and professionally for our customers. The Network Manager must be committed to embracing new and challenging opportunities and to taking the ARDOT network portfolio to a new level of excellence.

EXAMPLES OF WORK

The following examples are intended only as illustrations of various types of work performed. No attempt is made to be exhaustive. Related, similar, or other logical duties are performed as assigned. The Department may require employees to perform functions beyond those contained in job descriptions. The Department may modify job descriptions based on Department needs. The Arkansas Department of Transportation is an "at will" employer.

- Define how the scope, goals, and deliverables of IT networks, security and telecommunication should support business goals, fulfill end-user requirements, and identify and resolve systems issues in collaboration with management.
- Work with stakeholders to define business and systems requirements for new networks, security and telecommunication technologies.
- Define the short- and long-term strategies for the networks, security and telecommunication services to ensure effective delivery that meets current and future requirements.
- Cultivate and disseminate knowledge of networks, security and telecommunication usage and development best practices.
- Negotiate vendor contracts with networks, security and telecommunication specific products and services.
- Manage staff, including recruitment, supervision, scheduling, development, evaluation, and disciplinary actions.
- Review budget proposals, and recommend subsequent budget changes where necessary.
- Work collaboratively with staff and senior IT leaders to develop annual division goals. Maintain roadmap for assigned areas.
- Serve as the escalation point for networks, security and telecommunication and relevant customer service issues.
- Work individually and collaboratively with project managers and IT leadership to identify resources, risk, and communication that is necessary to ensure project goals are achieved.
- Ensure staff members adhere to project timelines and associated tasks are defined and achieved, prioritize and communicate potential barriers and recommend alternate strategies.
- Ensure sound operational procedures are implemented and in line with industry best practices and standards to establish high availability and reliable access to networks, security and telecommunication.
- Drive collaboration across teams to align enterprise architecture, documentation of support processes, policies and standardization of tools.
