

INTEROFFICE MEMORANDUM

January 12, 2018

TO: Master Files

FROM: John Fleming, Division Head, Environmental Division

SUBJECT: 2018 Pavement Preservation Program Projects
Multiple Job and FAP Numbers
Various Counties
Tier 1 Categorical Exclusion

After appropriate environmental review, it has been determined that the subject jobs fall under a Tier 1 Categorical Exclusion as described by the ARDOT/FHWA Memorandum of Agreement on Categorical Exclusion Documentation and Processing.

The purpose of these projects is to preserve and rehabilitate the highways. A table listing the projects, their locations, and type of work involved is attached, along with cultural resources clearances. No endangered species will be affected by the proposed projects. No Section 404 permits will be required. Public hearings will not be offered for these projects.

INTEROFFICE MEMORANDUM

May 10, 2017

TO: Environmental Job Files

FROM: William McAlexander, Environmental Scientist I WEM

SUBJECT: Archeological Clearance
AHTD Job No. 020659
Hwy. 270 - Hwy. 365 (S)
Jefferson County

The above referenced project involves resurfacing the roadway in Jefferson County. There will be no excavation of the road base. The project is designed to improve traffic safety and flow along this portion of the route.

An examination of the Arkansas Archeological Survey's (AAS) records was conducted for previously recorded archeological sites. No recorded sites are located within the proposed project area. A records check at the Arkansas Historic Preservation Program (AHPP) for properties listed in or eligible for the National Register revealed none for the resurfacing portion of the roadway. The Harden topographical map was examined for cemeteries, potentially historic structures, and landforms conducive to hold archeological sites. The 1825 and 1858 General Land Office plats showed no improvements or cultural features in the immediate vicinity of the project area. The 1936 Jefferson County road map showed several structures near the project area.

The project will be constructed within the existing roadbed and does not have the potential to affect any undisturbed land surfaces or potential cultural resources. This project is subject to the 1999 MOA and falls under the exempted work category "Resurfacing". This project is not considered an undertaking and requires no further work or Section 106 review.

INTEROFFICE MEMORANDUM

December 18, 2017

TO: Environmental Job Files

FROM: Wm. Lane Shields 

SUBJECT: Archeological Clearance
Job 050357
Hwy. 62-Fulton Co. Line (S)
Sharp County

This job proposes to level up, overlay and pave shoulders along 4.0 miles on Highway 175, Section 2 from the intersection of U.S. 62 in Hardy to the Fulton County line, all in Sharp County. No new right of way (ROW) or temporary construction easements will be required. The project is being conducted as a STIP job and no Native American consultation is required.

An archeological and historic records review was conducted for this project which includes the Arkansas Archeological Survey (AAS) site files of documented Native American and historical archeological sites, structures or features as well as the Arkansas Historic Preservation Program (AHPP) recorded structures and site/properties files. The National Register of Historic Places (NRHP) eligibility status is determined by the AHPP but presented in three databases. The NRHP status for archeological sites is in the AAS database, the status for architectural sites is in the AHPP database and the ARDOT tracks the status for bridges.

The AAS site files revealed two recorded archeological properties within a circa 2 km/1.25 mi. buffer along the corridor with the closest site, 3SH3, across the Otter Creek drainage from the highway. The AHPP site files show 46 structural sites, including 11 within a historic district in the same buffered corridor. The only site near the construction area is STH176, a recent building whose NRHP status is unknown. There are no bridges along the corridor.

Other records reviewed include the 1821 General Land Office (GLO) plat for T19N-R5W, the 1936 Sharp County highway map and a total of 20 versions of United States Geological Survey (USGS) quadrangles from 1892 to 1992. The GLO does not show any cultural features although drainages are roughly in the same position as today. The 1936 map's scale is problematic but it shows few houses along roads in the area. However, those roads do not correspond to the routes today as the areas are now flooded by reservoirs called Lakes Galilee, Cherokee, Sequoyah and Thunderbird. Even in locations that are not inundated, the current road does not follow the 1936 route. There are only five USGS quadrangles, dating from 1957 to 1983. Only the 7.5' scale map contains pertinent details but it was produced in 1962 and photorevised in 1981.

All work will take place on existing paved surfaces, no earthwork will be involved and the recorded cultural resources will not be directly or indirectly impacted. As a result, this project is subject to the 1999 MOA (enclosed) and falls under the exempted Work Category "Reconstruction". The project is not considered an undertaking and requires no further archeological research, fieldwork or Section 106 review.

Subject: Job No. 050365 - White County - AHPP No. 99511
Date: Friday, October 20, 2017 2:18:32 PM

The staff of the Arkansas Historic Preservation Program has reviewed the documentation submitted for overlay or resurface for Job 050365. Based on the information provided, we concur that the proposed undertaking will have no effect on historic properties. This effect determination could change should additional information come to light. Your hard copy should go out soon.
