INTEROFFICE MEMORANDUM

February 14, 2019

TO: Master Files

FROM: John Fleming, Division Head, Environmental Division Jule

SUBJECT: Job Number 100840

FAP Number NHPP-0056(36)

Ditch Nos. 1 & 47 Strs. & Apprs. (S)

Route 308, Section 1

Bridge Numbers M4012 & M4006

Poinsett County

Tier 2 Categorical Exclusion

The Environmental Division reviewed the referenced project and has determined it falls within the definition of a Tier 2 Categorical Exclusion under 23 Code of Federal Regulations, Section 771.117, and the ARDOT/FHWA Memorandum of Agreement on the processing of Categorical Exclusions. A public hearing will not be offered for this project.

The purpose of this project is to replace two structurally deficient bridges on Highway 308 in Poinsett County. Total project length is 0.52 mile. A project location map is attached.

The existing roadway consists of two 10' wide paved travel lanes with 3' wide paved shoulders. The two bridges to be replaced are over Ditch No. 1 and Ditch No. 47. Existing right of way width averages 80 feet.

The bridges will be replaced with a single bridge approximately 55' downstream. The new approaches will include two 11' wide paved travel lanes with 4' wide shoulders (2' paved). The right of way width will vary between 65' - 230'. Approximately 3.2 acres of additional right of way will be required for the project.

Design data for this project is as follows:

Design Year	Average Daily Traffic	Percent Trucks	Design Speed
2019	490	7	55 mph
2039	560	7	55 mph

The project will not involve relocations, prime farmlands, wetlands, underground storage tanks, hazardous materials, environmental justice issues, or cultural resources. This project has been determined to generate minimal air quality impacts for Clean Air Act criteria pollutants and has not been linked with any special mobile source air toxic (MSAT) concerns. The State Historic Preservation Officer's clearance is attached.

Piping Plover (*Charadrius melodus*), pallid sturgeon (*Scaphirhynchus albus*), Fat Pocketbook (*Potamilus capax*), Rabbitsfoot (*Theliderma cylindrica*), Scaleshell Mussel (*Leptodea leptodon*), and pondberry (*Lindera melissifolia*) are species potentially affected by the proposed project. This project will not affect these species due to the lack of suitable habitat and distance to known species locations. There are no wetlands to support pondberry and the nature (size, shape, etc.) of these ditches does not contain suitable habitat for the other species.

The project will have a discharge of dredged or fill material into waters of the United States associated with the bridge construction; therefore, a Section 404 permit will be required. The project should be authorized by Nationwide Permit 14 for Linear Transportation Projects as defined in Federal Register 82(4): 1860-2008.

Poinsett County participates in the National Flood Insurance Program. The project lies within Zone A, Special Flood Hazard Area. The 100-year floodplain limits extend across the limits of the project. Adjacent properties should not be impacted nor have a greater flood risk than existed before construction of the project. None of the encroachments will constitute a substantial floodplain encroachment or risk to property or life.

Noise predictions have been made for this project utilizing the Federal Highway Administration's TNM 2.5 (Traffic Noise Model) procedures. These procedures indicate that noise levels are below the FHWA noise criteria beyond the project's proposed right of way limits. Any increases in roadway noise levels will not be the result of the proposed project, but instead a result of traffic volume increases during the planning period (Year 2039). Therefore, any noise level increases will

Job Number 100840 Tier 2 Categorical Exclusion Page 3 of 3

occur independently of this proposed project, and no project related noise impacts are anticipated. In compliance with Federal guidelines, local authorities will not require notification.
