

SLAB JOINT DETAIL

9/05/03

On all future projects, use the following slab joint detail and note.  
*Editing for special situations, such as sidewalks, stage construction, etc. will/may be needed.*

Use Type 6 Joint Sealer. See Subsections 501.02(h) and 501.05(j). Joint Sealer shall be measured and paid for as Class S(AE) Concrete-Bridge. Slab Joints shall extend to the outside edge of the deck slab. Slab joints shall be installed before the parapet railing is poured. If slab joints are to be sawed, they shall be sawed as soon as the concrete has sufficiently set to allow sawing of the joint without damage to the slab. Slab joints shall be placed at all pouring sequence construction joints and required slab joint locations.
