

ARKANSAS STATE HIGHWAY AND TRANSPORTATION DEPARTMENT

LITTLE ROCK, ARKANSAS

MARCH 1, 1982

CONSTRUCTION MEMORANDUM NO. 82-4

TO: DISTRICT AND RESIDENT ENGINEERS

SUBJECT: Linseed Oil Application

It has been determined that the material specified in Section 802.23(2) for "Sprayed Finish" will provide the same protection as the application of the boiled linseed oil specified in Section 803 "Protective Treatments for Concrete". Therefore, linseed oil should not be applied on any surface which will have a sprayed finish.

In addition to reducing the quantity of the linseed oil, the appearance of the structure will also be enhanced.

Dan L. Flowers
State Construction Engineer

BJP:LBD

Handwritten Note:

On jobs where we require the sprayed finish on parapet rail we should not call for linseed oil on the parapet.

V. Pinkerton
