

INTEROFFICE MEMORANDUM

DATE: October 18, 1985

TO: MR. DON POTTER, ENGINEER OF HYDRAULICS
FROM: Robert L. Walters, Engineer of Roadway Design
SUBJECT: Design Flows for Detour Roads

Due to a majority of our bridge replacement jobs requiring detour roads to be constructed, we had the need to set up a Design Frequency for Detour Water-way Structures. We currently have set up a 2-year Design Frequency and request that on all Hydraulic analysis that you supply the 2-year flow information.
