

INTEROFFICE MEMORANDUM

DATE: February 5, 1986

TO: ROADWAY DESIGN, STATE AID, RIGHT OF WAY, BRIDGE DIVISIONS
FROM: Brook O. Nichols, Asst. Chief Engineer - Design
SUBJECT: Temporary Construction Easements

It has come to my attention that in many cases Temporary Construction Easements significantly larger than needed for actual construction are being shown on Construction plans. This creates a problem with the property owner, since the State may theoretically work in any part of the easement.

On future projects, please limit the size of Temporary Construction Easements to what is needed for actual construction plus reasonable working room
