

DATE: April 27, 1989

TO: BRIDGE DIVISION PERSONNEL

FROM: Veral Pinkerton, Bridge Engineer

SUBJECT: AWS Structural Welding Code

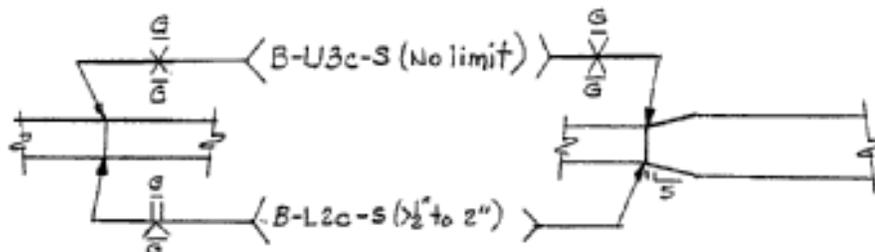

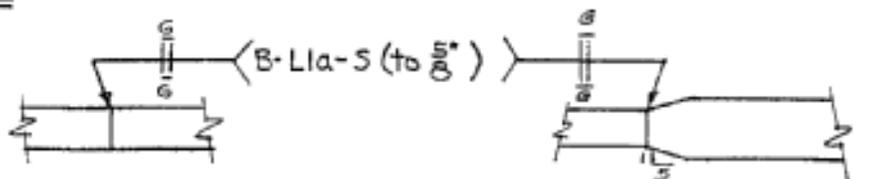

Supplemental Specification 807-1 has been revised effective April 27, 1989, to designate the Bridge Welding Code ANSI/AASHTO/AWS D1.5-88 as to the Governing Specification for welded highway structures. This makes the new welding code in effect for the May 31, 1989, and later lettings.

Due to change in the acceptable welds in the new code, our previous list of acceptable butt welds has been revised. Attached is a copy of the revised sheet.
