

INTEROFFICE MEMORANDUM

DATE: May 1, 1990

TO: Mr. Veral Pinkerton, Bridge Engineer
FROM: Robert L. Walters, Asst. Chief Engineer - Design
SUBJECT: Detour Bridge Widths

The following shall be the criteria for determining detour bridge widths:

- A. Arterials - 24' minimum width
- B. Collectors - 24' if current ADT exceeds 2000 vpd
20' if current ADT is 2000 vpd or less

Current ADT should be considered to be the ADT in the year construction begins.

This memorandum superseded the January 9, 1985 memorandum by Mr. Nichols.
