

INTEROFFICE MEMORANDUM

DATE: September 2, 1992

TO: BRIDGE DIVISION PERSONNEL
FROM: Veral Pinkerton, Bridge Engineer
SUBJECT: 1993 Construction Specifications
Backfill of Piers in Stream Bed

Due to the new pollution control regulations, the 1993 Construction Specifications will not require backfilling around piers in the stream bed unless specified on the plans.

If you feel backfilling is necessary at any particular location, this should be shown on the plans and the specifications will require that it be backfilled with gravel or crushed rock unless otherwise specified.
