

INTEROFFICE MEMORANDUM

DATE: September 27, 1996

TO: Squad

FROM: Ed Fain, Design Section Supervisor

SUBJECT: Dead Load Deflections
Beams at a Variable Distance From Profile Grade Line

1. Beams are chords to concentric arcs.
2. Beams parallel to the chord of an arc.
3. Splayed beams.

For the situations shown above, include the following note with the dead load deflection table:

Tabulated values shown require an adjustment for cross-slope to beams to achieve proper camber.
