

Clarifications and questions regarding the 2019-2022 On-Call Geotechnical Services request Letters of Interest.

General notes and comments

1. **Is AASHTO certification of labs required or can it be completed at a later date?**

Firms must have current AASHTO certified labs in order to receive further consideration.

2. **Regarding “Advanced geophysical site characterization” expand on what ARDOT is expecting/requesting.**

This will include, but is not limited to, geophysical techniques used to determine Site Specific Seismic Ground Response, identify subsurface features such as top of rock and rip ability, and downhole logging.
