IMPROVEMENTS TO THE INTERSTATE 430/630 INTERCHANGE IN LITTLE ROCK TO REQUIRE PERIODIC LANE CLOSURES

LITTLE ROCK (2-24) -- Crews erecting beam girders for the new Interstate 430 South to Interstate 630 East flyover bridge in Little Rock will require periodic night time 15-minute lane closures on the Interstate 430 North to Interstate 630 West Loop Ramp beginning this weekend, according to Arkansas State Highway and Transportation Department (AHTD) officials.

The improvements will require the northbound Interstate 430 exit ramp to Interstate 630 West to be closed for 15-minute periodic intervals beginning on Sunday night, February 26th and continuing through Tuesday night, February 28th, weather permitting. The periodic 15-minute lane closures will be in effect between the hours of 9:00 p.m. and 5:00 a.m.

Motorists exiting Interstate 430 North to Interstate 630 West will be required to stop as beam girder erection takes place. Also, motorists exiting Interstate 630 East to Interstate 430 North may be impacted and should use caution due to the close proximity of the work to the stopped traffic.

Motorists should exercise caution when approaching and traveling through all highway work zones.
