IMPROVEMENTS TO STATE HIGHWAY 38 WILL REQUIRE LANE CLOSURES IN PRAIRIE COUNTY

PRAIRIE COUNTY (10-19) – Improvements to State Highway 38 will require lane closures in Prairie County, according to Arkansas State Highway and Transportation Department (AHTD) officials.

Crews will seal the highway with Bituminous Surface Treatment (liquid asphalt and pea gravel). **The work will begin at Salem Road on the Prairie/Lonoke County Line and extend eastward to the vicinity of Highway 86.**

The lane closures will **continue on Tuesday, October 20th between 7:00 a.m. and 5:00 p.m. and last for two weeks**, weather permitting.

Bituminous surface treatment is a proven method of sealing cracks and providing a durable wearing surface utilizing local materials at an economical cost. It usually takes from four to eight days from the time the material is placed until the loose material is swept off the roadway. The time varies with the length of the section being surfaced and weather conditions.

Drivers are urged to use caution when traveling on a highway that is undergoing this treatment because gravel can cause glass breakage when it is kicked up by a vehicle that is traveling too fast for conditions.

Numerous signs are placed near the work zone to warn drivers of the conditions and to restrict speed to **15 mph**. Speed is the primary factor in reducing glass damage.
