### **Maintenance on State Highway 10 Requires Alternating Lane Closures**

**PULASKI COUNTY (7-7)** – Maintenance to State Highway 10 requires a series of alternating lane closures in Pulaski County, according to Arkansas State Highway and Transportation Department (AHTD) officials.

The alternating lane closure will occur between **9:00 a.m.** and **4:00 p.m.** daily from **Monday, July 10** through **Thursday, July 13** starting at Higginbotham Loop Rd. and continuing to Bringle Creek Rd.; weather permitting.

This will reduce traffic to one lane within the work zone. Traffic will be controlled using warning signs and flaggers. Crews will seal State Highway 10 with Bituminous Surface Treatment (liquid asphalt and pea gravel).

Bituminous surface treatment is a proven method of sealing cracks and providing a durable wearing surface utilizing local materials at an economical cost. Although loose material is swept from the roadway after the treatment is placed, it usually takes from four to eight days from the time the material is placed until the pea gravel is fully bonded to the roadway. The time varies with the length of the section being surfaced and weather conditions. Therefore reduced speeds are recommended for two weeks following the work.

Drivers should exercise caution when approaching and traveling through all highway work zones.
