

# Gill St. & RR Overpass Strs. & Apprs. (Hwy. 10)

Job 061454

## Project Overview

The proposed project includes the replacement of the eastbound and westbound Highway 10 (Cantrell Road) bridges that span over the Union Pacific Railroad, Gill Street, and Water Works Drive in Little Rock, Arkansas.

The proposed project also includes two separate bridges for pedestrian and vehicular traffic on the north and south sides of Highway 10, respectively. The additional structures provide similar connectivity as the current conditions.

## Maintenance of Traffic

Utilizing a northern offset will allow four lanes of traffic (two in each direction) to be maintained during peak hours throughout construction.

## Road Closures

- **Gill Street and Water Works Road** below the Highway 10 Bridges are proposed to be temporarily closed during construction.
- The **Schiller Street** connection with Highway 10 is proposed to be permanently closed. Access to eastbound Highway 10 is proposed through a new entrance from Gill Street.

## Timeline

The proposed project is estimated to begin construction in late 2020. This schedule is preliminary and subject to change.
