

ADDENDUM NO. 2

TO: All interested parties

DATE: May 25, 2010

SUBJECT: City of Eureka Springs Transit System
Request for Proposals - Passenger Shelters

Please make the following additions/changes to the above referenced project:

On Page 6, Section 6(d) now reads as follows:

d. Material and Design

The shelters shall be constructed of an aluminum frame assembly with a powder-coated finish. Finish color will be chosen from a standard color offering chart. It is important to ESTS that the design not obscure or obstruct the natural and environmental beauty of the community, the inclusion of side or rear walls is not important

For purposes of this RFP, steel is an acceptable substitute for aluminum.
